## BSNL makes GST transition easier

The state owned telecom giant Bharat Sanchar Nigam Limited (BSNL) in partnership with M/s Masters India Private Limited (MIPL) introduced GSP/ASP service on 29 August, 2017 on Pan India level. This initiative will assist small and medi-

um enterprises as well as large business houses in transitioning to GST by launching an application software which will record invoices on a PC/ handled device or a smart phone along with all the GST compliances like preparation of GST returns, assistance

in generation of GST challans for payment, filing of GST returns and sending back mismatch invoices.

The ASP/GSP service will be available to the BSNL existing customers for free, at present. The application software for GST

returns filing and compliances has been designed so that even a small businessman with little IT skills can ensure GST compliances. The BSNL customers can avail these services by visiting 'GSP services' menu under 'GST' tab on our website, [bsnl.co.in](http://bsnl.co.in).
